

## **Environmental and Sustainability Policy**

Walter Tosto WTB Srl is a Company belonging to the Tosto Group recognized as one of the international leaders in the manufacturing of pressure equipment for the Chemical, Petrochemical and Refining industries.

One of the aim of our Company is to become a pioneer in the global market for the manufacturing of components for “Green Energy” development. In fact, the company pays particular attention to the research and development of innovative solutions and thus to contribute through its products to global evolution and progress. All within a general framework of sustainability and energy balance.

Our goals require us to adapt our facilities and Group companies to the highest existing quality standards and, when possible, to exceed them.

In order to keep our development goals in line with the objectives set in the Environmental and Energy Saving policies, we are committed to:

- Comply with all the legal requirements also regarding energy efficiency, energy use and consumption;
- Protect the environment by preventing all forms of pollution and limiting the impact of environmental processes in terms of atmospheric emissions, acoustic impact, water discharges and waste management;
- Identify and adopt measures for energy, raw materials and natural resources saving, favouring waste recovery instead of waste disposal;
- Always promote the improvement of our management systems and its performance;
- Orient the production towards eco-compatible products (when possible);
- Promote employees responsibility and awareness with appropriate training programs;
- Believe and invest in innovation that respects sustainability criteria;
- Adopt an open and honest dialogue with the public authority and with the external community in order to make people aware of the real environmental aspects of the company activities;

To achieve its commitments, Walter Tosto WTB follows the concept of “risk-based thinking” for its business management, extending it to all organizational levels, planning and implementing all the necessary actions to face risks and meet opportunities.

The best way to ensure a prosperous future for the supply of our products and services is through the pursuit of continuous improvement.

The Sustainable Policy, together with the Code of Ethics, is a point of reference for all the employees and stakeholders of the Company.
